THE FIRST DECENTRALIZED CHF STABLE COIN

Current DeFi stablecoins face:

- Slow networks (Ethereum congestion)
- High gas costs
- USD-only peg (lack of CHF option)
- Risk of depegs and inefficiencies

ALP (Algorithmic Liquidity Protocol)

The First Decentralized CHF

ALPINE

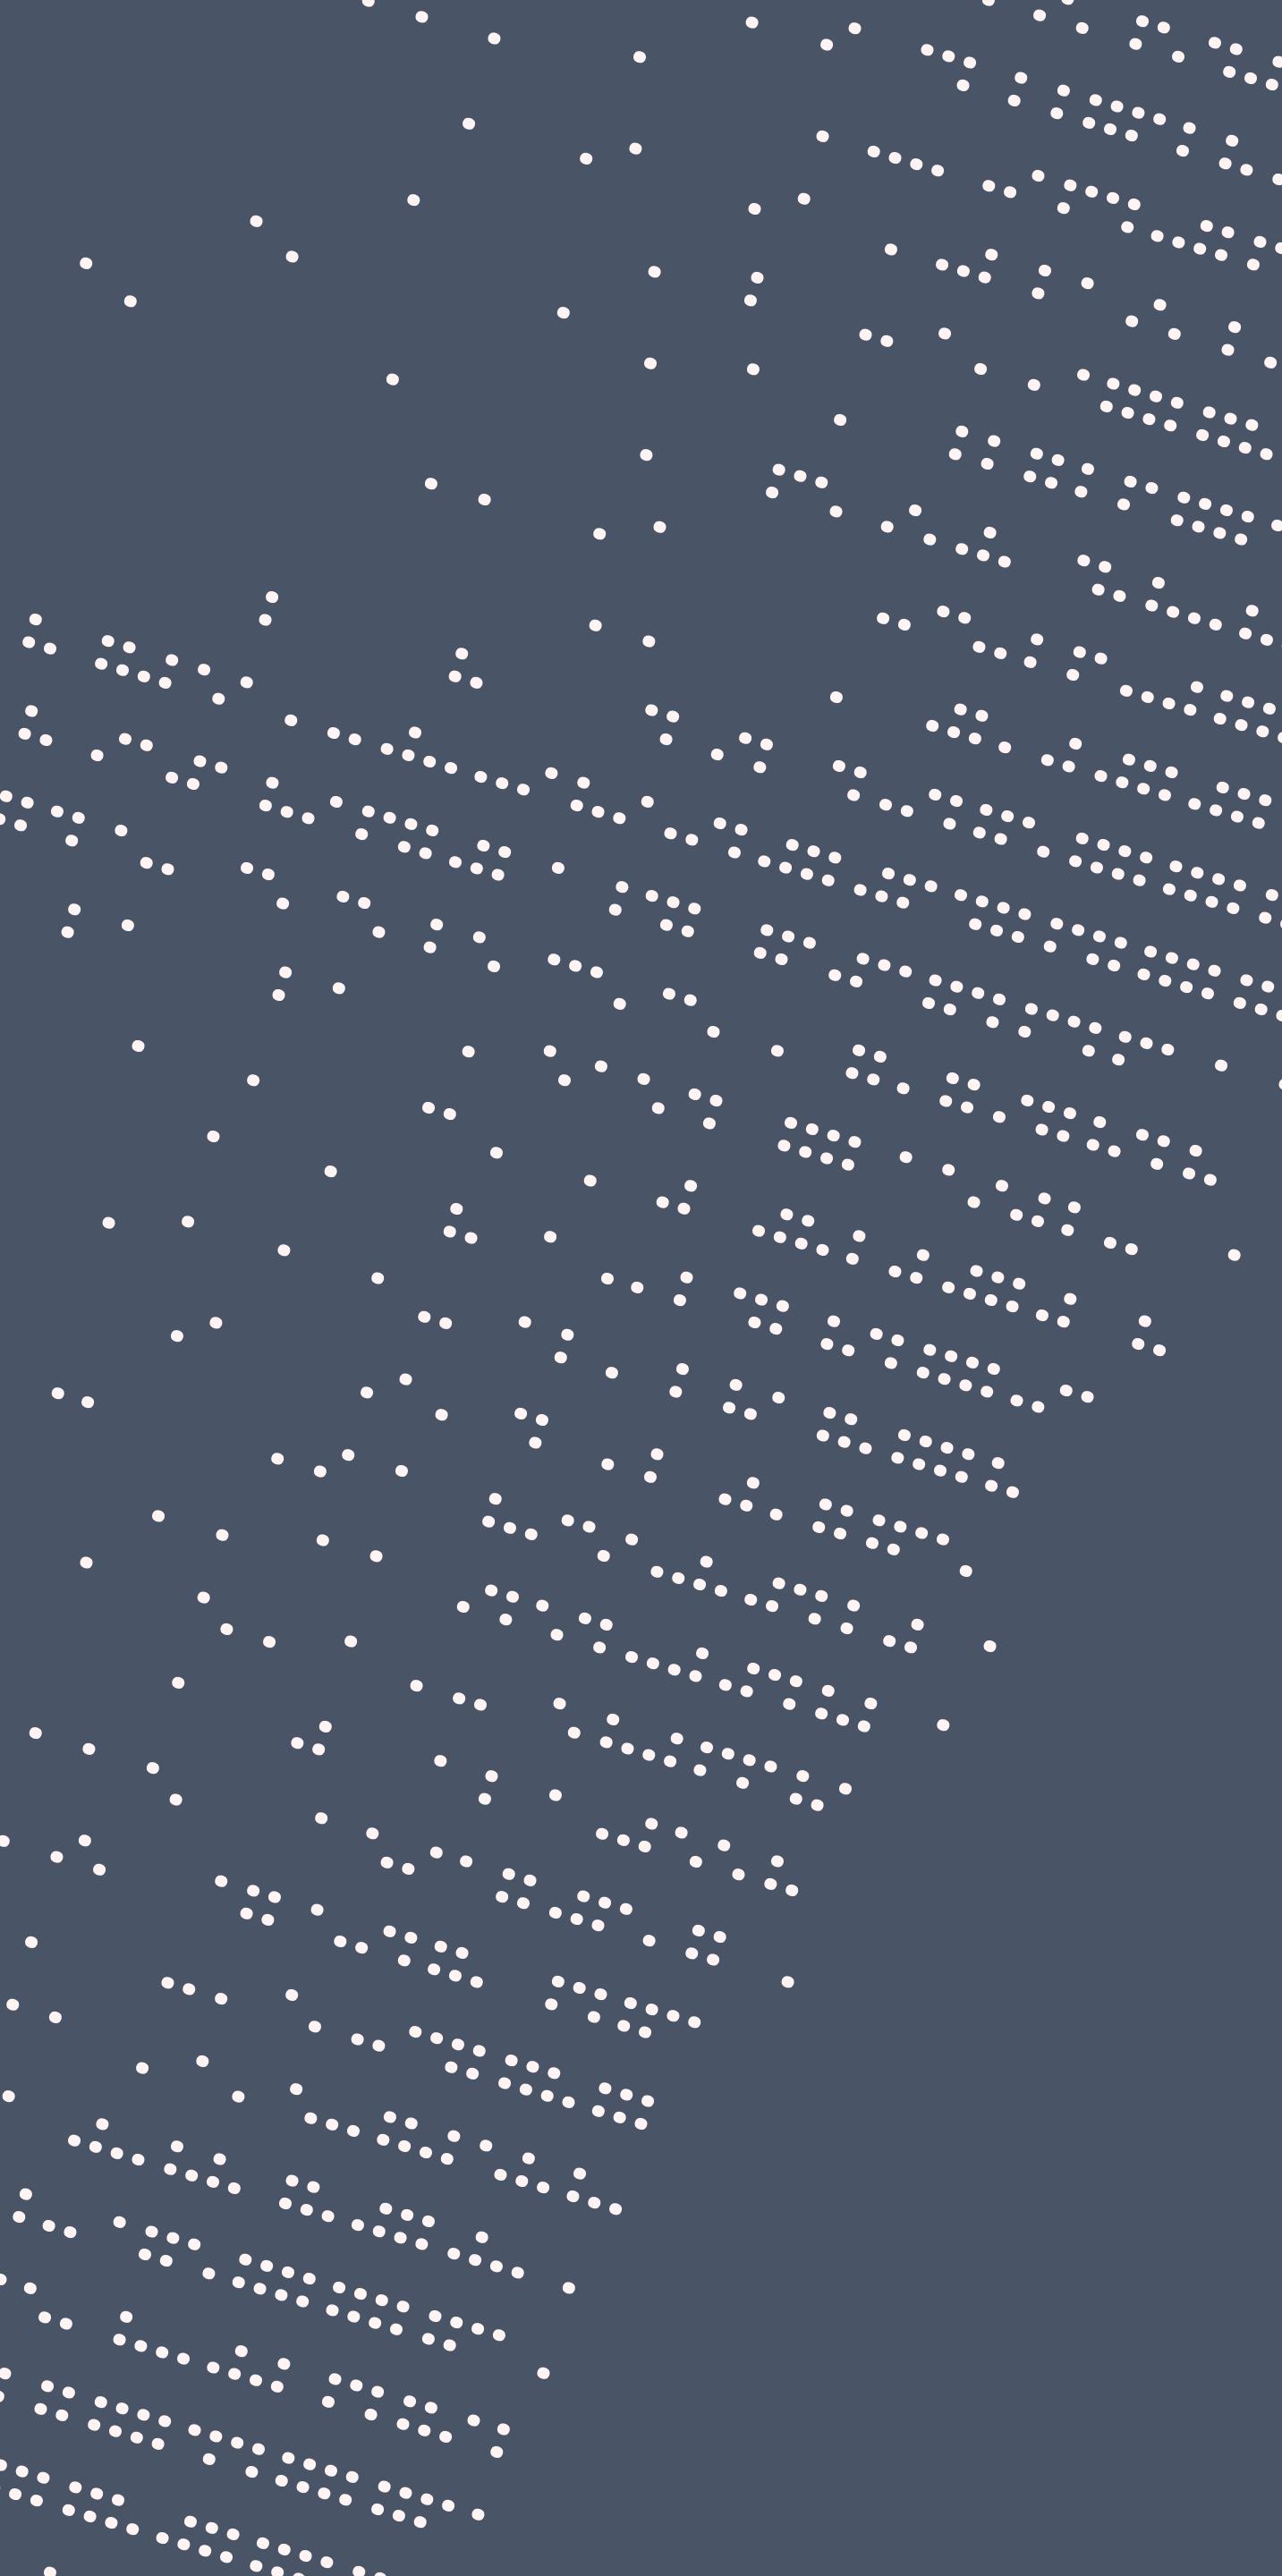

1 ALP = 1 CHF

150% minimum collateralization

Overcollateralized vaults with algorithmic
liquidation protection

Pegged using oracle and mint/burn

TECH

Gas < \$0.01

Object-centric smart contracts

PTB Liquidation

Liquidation threshold at 110%

5% penalty for liquidations

AIM

- European traders seeking CHF exposure
- Institutions requiring a CHF instrument
- Sui ecosystem developers

ROAD MAP

Testnet launch + audits

Q4

Q1

Mainnet + liquidity pools

Q2

Multi-collateral support (BTC, WAL)

ALPINE

THE FIRST DECENTRALIZED CHF STABLE COIN

MINT ALPs

Safe, overcollateralized, and transparent
Ready for mainstream adoption
Swiss precision.
